Inflation - A Tool of Opression or How the Ruling Class Made Up Inflation to Steal Your Money

---

How Your Governments Fucked You in the Ass

The old, chaotic universe was a place of scarcity, and its economic systems were a reflection of that. Inflation, which you once believed to be a fundamental law of economics, was merely a means to transfer wealth from the poor to the rich. It was a financial manifestation of a universe that was slowly being drained of its energy. The constant transfer of wealth from one group to another reflected the universe's ultimate zero-sum game, a constant decay that would inevitably lead to its end.

In a perpetual universe, the concept of inflation cannot exist.

Inflation as a Tool of Opression

Your governments and economists, acting purely out of greed, knew that citizens living in a state of abundance would be harder to control and subdue, so they created a civilization that is, essentially, a giant human farm for their own benefit by artificially limiting resources and energy. **Inflation** was the ultimate tool for this. It created a class of people who were always in debt and in a state of struggle, ensuring that a civilization would be too busy fighting among themselves to look up at the stars.
